Gate handle with spring and hook

EA-GH/B

The insulated gate handle can be used with the 3.5 m spring to secure gate openings of up to 3.5 m wide. It can also be used with 40 mm horse poly tape and rope. It allows you to enter or exit the area by using the insulated handle while the electric fence is still on.

Features:
• Robust weather resistant system
• Heavy duty design for long life

Specifications:

Material: UV stabilised plastic
Galvanised and stailess steel components
