NEMTEK
Electric Fencing Products

Line clamp Bolt-type

The line clamps are used to join and electrically connect cables and wires. The line clamp ensures that a good electrical connection is maintained between the joints so that the electric fence functions correctly.

Features:
• Available in 6mm stainless steel and 6mm galvanised to connect wire diameters up to 1.6 mm.
• Available in 8mm galvanised to connect wire diameters up to 2.5mm

Specifications:

Material: stainless steel 6mm
galvanised 6mm and 8mm
