Combo tensioner standard

ES-CTS

The combo tensioner with a plastic insulator is a tension system all in one.The combination of the plastic insulator and the galvanised body reduces material cost and installation time.

Features:
- Can tension from a 1.2 mm wire up to 2.5 mm wire, making it very versatile
- Only used for galvanised electric fence wires to avoid galvanic reaction

Specifications:

Finish: Hot dip galvanised
Material: UV stabilised insulator
