Mini nylon tensioner

ES-DT/MN

The mini nylon Titan tensioner is used when the fence needs to be tensioned after installation, especially when the system needs maintenance due to sagging wires.

The mini nylon tensioners offer the following features:

-eliminate galvanic reaction between dissimilar metal thus reducing rust

-ideal for tensioning up to 1.2 mm galvanised or stainless steel wires, and up to 1.6 mm aluminium wire

A large headed screwdriver, which is generally easily available, is used to turn the spindle.
