

Warning sign

Warning signs must be placed along the fence line to warn of the existence of an electrified fence. These must be placed at 10m intervals along the fence, at gate ways or whenever there is a change of direction. Wire clips on the warning sign reduce installation time.

Features:

- IEC 60335-2-76 compliant design
- Custom versions are available on request in both screen or pad print

Specifications:

Material: UV protected for long life
