

Solid galvanised wire

Solid galvanised wires are ideal for long permanent electric fencing systems. The heavy galvanised high tensile strength wire is used where a long life and durable electric fence is required. It's ideal for the larger farm animals and game electric fencing systems.

Features:

- Heavy duty high tensile strength wire
- Long life expectancy on a fence
- Larger diameters offer lower electrical resistance
- Available in light galvanised for inland use and heavy galvanised for coastal areas

Specifications:

Material: High tensile steel

Tensile breaking strength:

2.0mm: ~320kgs

2.24mm:~ 400kgs

Resistance:

2.0mm 60Ohms/km

2.24mm 50Ohms/km
