

Stranded stainless steel wire

Stranded stainless steel offers a higher resistance to corrosion environments and a longer life span on the fence. The 316 grade is the wire of choice for highly corrosive coastal areas. The flexibility offered by the stranded wire construction makes working with this wire easier during installation and results in a neat clean look on the fence without compromising the fences performance.

Features:

- Easy to work with stranded wires
- Stainless steel grade 304 can be used in most corrosive environments and near the coast (5km)
- Stainless steel grade 316 can be used in most harsh corrosive environments and on the coast .
- High in tensile strength which is harder to cut

Specifications:

Material: AISI 304 and 316 Grade stainless steel

Construction: Stranded 1x7

Minimum Breaking Loads : 110kg

Safe working load: 20%: 22kg
